

Gradient Tool

- Neutral Density
 - Instead of buying Neutral Density Filters for the Camera
 - Use LR
 - In the Develop Mode
 - 4th tool over (Histogram) - it is a rectangle box
 - Ex. Using a Lighthouse with pale both blue and pale sky
 - Click on Neutral Density Filter
 - Start at the top of image
 - Drag down to get the desired look
 - This will make the Lighthouse dark but add color to the sky
 - Look at the Panel under the Crop Tool
 - You will get a menu Mask / New / Edit / Brush
 - If the Lighthouse is too dark
 - Select the Brush
 - Go to the Brush Options (lower bottom in Develop Mode)
 - Then brush the desired effects within the existing Gradient Panel
