

Lightroom

Camera Profile

- Profiles set by the Camera
- If shooting Jpg, you can not change
- However, RAW, you can change the profile
 - Specific for each camera make
- Can add a Preset for various Calibrations
 - See **Pre-Sets** (Notebook) for developing a Pre-Set
 - This would only be used to set various calibrations
 - It only works in RAW format
 - Add the Pre-Set is it is used in **Import**
 - Go to Develop Settings
 - Select Saved Pre-Set
 - Find the Profile wanted
